Product Designer | UI/UX Designer | User Research & Prototyping

Experience

Product Designer

Sep 2025 – Current

8Answers, Bengaluru

Designed and shipped 3 fully responsive cross-platform products (Android, iOS, Windows, macOS) from concept to launch, owning the full UX process: research, wireframing, prototyping, and usability testing.

1. 8Answers: Real Estate Project Management SaaS Platform | [Link](#)

- Conducted 10+ user interviews with real estate administrators and project managers, identifying workflow bottlenecks and collaboration challenges across project operations.
- Designed end-to-end desktop experiences including information architecture, user flows, wireframes, prototypes, and role-based dashboards for Admins, Project Managers, Partners, and Agents.
- Led usability testing and design iterations, improving workflow efficiency through offline-online synchronization, access control systems, and optimized collaboration workflows.
- Product currently supports 15+ active users managing real-estate project operations.

2. whatihad.info: AI Nutrition Tracking Platform | [Link](#)

- Conducted user research with 30+ hostel residents, PG occupants, and college students, identifying unmet needs around affordable nutrition planning.
- Synthesized research into personas, user journeys, wireframes, and interactive prototypes.
- Designed onboarding, meal tracking, nutrition analytics dashboards, and AI-powered recommendation experiences.
- Iterated designs through usability testing with 20+ early users, improving accessibility, engagement, and recommendation workflows.

3. Yard Deck: Sports Event Management B2B Platform | [Link](#)

- Independently designed and developed the platform frontend using HTML, CSS, JavaScript, and Codex.
- Designed registration, onboarding, waitlist management, and payment workflows for organizers and participants.
- Successfully launched across 3 live sporting events, supporting 400+ registrations and streamlining operations.

Product Intern

Jun 2025 – Aug 2025

Wiingy, Bengaluru

- Conducted UX research with 30+ new users to identify onboarding and conversion opportunities.
- Collaborated on user experience improvements focused on increasing engagement and reducing friction.
- Created and optimized 200+ AI-assisted landing page content sections across 12+ subjects and 100+ cities, contributing to a 30% improvement in engagement metrics.

Business Development Intern

Jan 2025 – Jun 2025

CHINT India Energy Solution Pvt. Ltd., Bengaluru

- Conducted market and user research across India, APAC, Europe, and the US engaging 500+ industrial users and 1,500+ distributors to identify trends, pain points, and product opportunities.
- Automated research and data collection workflows, improving analysis efficiency by 75%
